The Formentera Council's mobility office reports that the new blue zone parking on the western side of la Savina port—currently the site of parking for rental cars—will be incorporated into the island's metred or “regulated” parking scheme from tomorrow, Monday May 13.

The system will be unveiled—and will function just like in other parts of la Savina and other towns of the island—as soon as the Council obtains the go-ahead from the Balearic port authority to manage parking in the area.

The move will add 80 extra *zona blava* parking spaces in la Savina. An overflow parking lot has also been opened opposite plaça Illes Pitiüses.
